MET

PARTIAL

GAP — Not Available

01	Maturity Reminder with Action Plan Module 05 — Maturity Reminder · Automated reminders when a product matures, with a detailed action plan including talking points. Detects maturities within 30/60/90-day horizon from Oracle ADB AI generates reinvestment recommendation action plan per customer Action Plan Follow-up button, share via Email / WhatsApp Talking points are reinvestment-focused; not structured per customer dialogue script System is ON-DEMAND only — no automated push/email notification scheduler No supporting documents or product brochures attached to reminders
02	Product Profile Matching & Recommendation Module 06 — Product Recommendations · List of products matching the customer's profile with justification, details, risks, and goals alignment. Profile Matching: risk tolerance, portfolio gaps, transaction history Recommendation List: ranked products with fit score per customer Recommendation Justification: multi-factor AI scoring + Bahasa rationale Product Details: fit score & rationale shown; explicit risk/benefit/tenor per product not confirmed Recommendations are batch/portfolio-wide — no per-customer on-demand lookup No product detail sheet or brochure link shown alongside each recommendation
03	Portfolio Alerts with Actionable Insights Module 08 — Portfolio Alerts · Alerts for significant portfolio changes with reason, affected assets, and actionable recommendations. Alert triggers: Churn Risk, Idle Funds, KYC Expiry, Maturity, AUM Drop Per-alert card: affected investment, reason, severity badge AI-generated remediation steps ranked by impact; link to Customer 360 Suggested actions include discuss/review; direct rebalancing workflow not present Alert parameters NOT configurable by Product Team — criteria are system-hardcoded Market-event-driven alerts (e.g. IHSG drop, rate hike) not implemented

OVERALL VERDICT: PARTIALLY MET — Gaps Identified

GOAL & BENEFIT

Goal: Receive automated reminders when a product matures, with a suggested action plan.

Benefit: RM can immediately strategize a rearrangement strategy for customers.

Module: [Module 05 — Maturity Reminder](#)

WHAT IRM CURRENTLY PROVIDES

- ✓ Detects upcoming maturities within 30/60/90-day configurable horizon
- ✓ AI generates personalized reinvestment recommendation per customer
- ✓ Action Plan Follow-up CTA available after each analysis result
- ✓ Share via Email and WhatsApp for direct customer outreach

ACCEPTANCE CRITERIA GAPS

PARTIAL

Action Plan Format

The action plan provides reinvestment product suggestions but lacks a structured customer dialogue script with specific talking points (e.g., objection handling, yield comparison narrative, persuasion cues).

GAP

Automated Push Notifications

System is ON-DEMAND only: RM must manually trigger analysis. There is no scheduled push notification, email alert, or in-app reminder that fires automatically when a product reaches maturity date.

GAP

Supporting Documents

Reminders do not include attached product brochures, term-sheet PDFs, or factsheet links to support the conversation. RM must source these separately.

PARTIAL

Specific Criteria Scope

Acceptance criterion: "Each reminder includes a detailed action plan with specific talking points and supporting data." Current output is AI-text only, without structured per-product documentation.

RECOMMENDATIONS FOR IMPROVEMENT

1 Add scheduled job (cron/Oracle DBMS_SCHEDULER) to push maturity alerts automatically

2 Structure action plan output with labelled sections: Opening, Value Proposition, Objection Handling, Close

3 Attach product factsheet URL or PDF link to each recommended reinvestment product

4 Integrate notification channel: in-app badge + optional email digest

5 Allow RM to set personal reminder horizon (e.g., alert me 14 days before maturity)

OVERALL VERDICT: PARTIALLY MET — Gaps Identified

GOAL & BENEFIT

Goal: See a list of products that fit the customer's profile with justification and product details.

Benefit: RM can confidently recommend the most suitable products for each customer.

Module: Module 06 — Product Recommendations

WHAT IRM CURRENTLY PROVIDES

- ✓ Profile matching uses: risk tolerance, portfolio gaps, transaction history, market context
- ✓ Ranked recommendation list with fit score + AI rationale (Bahasa Indonesia)
- ✓ Multi-factor scoring: portfolio gap, risk alignment, AUM potential, urgency
- ✓ Share CTA + Action Plan Follow-up per recommended customer

ACCEPTANCE CRITERIA GAPS

PARTIAL

Product Details per Recommendation

Each recommended product should show: benefits, risks, tenor/duration, projected return, and alignment with customer goals. Current output shows product name + fit rationale but does not display a full product detail card.

GAP

Per-Customer On-Demand Lookup

Recommendations are generated as a batch for the entire RM portfolio. There is no "recommend products for THIS customer" feature accessible directly from the Customer 360 profile page.

GAP

Product Catalog Detail Page

No product brochure or detail sheet is linked or displayed alongside each recommendation. RM cannot drill into product terms, rates, or risk rating from within the platform.

PARTIAL

Customer Goal Alignment

Criterion: "alignment with customer goals." The system uses risk profile and AUM; explicit customer financial goals (retirement, education, etc.) are not captured or used as a matching dimension.

RECOMMENDATIONS FOR IMPROVEMENT

1 Add Product Detail panel/modal: show tenor, return rate, risk rating, min invest, and goal tag

2 Add "Get Recommendations" button on Customer 360 profile for per-customer on-demand reco

3 Capture customer financial goals during onboarding and use as a reco filter dimension

4 Link product factsheet PDF or bank product page URL alongside each recommendation card

5 Show product comparison view (side-by-side) for top-3 recommended products

OVERALL VERDICT: PARTIALLY MET — Gaps Identified

GOAL & BENEFIT

Goal: Receive alerts for significant portfolio changes/issues with reason, affected assets, and actionable recommendations.

Benefit: RM can promptly address significant changes and take appropriate action to manage portfolios effectively.

Module: Module 08 — Portfolio Alerts

WHAT IRM CURRENTLY PROVIDES

- ✓

Alert categories: Churn Risk, Idle Funds, KYC Expiry, Maturity Approaching, AUM Drop
- ✓

Per-alert card: affected investment name, risk type, severity badge (Critical–Low)
- ✓

AI-generated root-cause explanation and ranked remediation steps
- ✓

One-click Customer 360 link for immediate in-depth investigation

ACCEPTANCE CRITERIA GAPS

GAP

Product-Team Configurable Parameters

Criterion: "alerts triggered based on predefined criteria that can be set by Product Team." Current alert triggers (churn threshold, AUM drop %, idle days) are hardcoded in the system. There is no configuration UI for Product Team to set or adjust alert parameters.

GAP

Market-Event-Driven Alerts

No alerts are triggered by external market events (e.g., IHSG drops >3%, BI Rate change, USD/IDR volatility). Alerts are purely portfolio-level, not market-condition-aware.

PARTIAL

Direct Rebalancing Workflow

Criterion: "actionable insights such as rebalancing assets or selling underperforming investments." Current alerts provide text recommendations only; no in-platform workflow exists to directly initiate a rebalancing or sell action.

GAP

Underperforming Asset Detection

No alert type specifically monitors for underperforming assets against benchmark returns. Current alerts focus on lifecycle events (maturity, KYC), not performance.

RECOMMENDATIONS FOR IMPROVEMENT

1

Build Admin/Product Team configuration panel for alert thresholds (AUM drop %, idle days, etc.)

2

Integrate market-event triggers: connect to live market data feed → fire alerts on IHSG/rate events

3

Add "Underperforming Asset" alert type comparing holding returns vs. benchmark/peer

4

Add direct action buttons in alert: "Schedule Discussion," "Initiate Rebalancing," "Create Follow-up Task"

5

Enable RM to subscribe/unsubscribe to specific alert categories per customer segment

RM Alert Report

🚨 HIGH — TINDAK LANJUT DALAM 24 JAM

Terdeteksi: 1 Jun 2026, 19.09 • RM segera hubungi nasabah Hendra Kusuma Jati

- Metrik spesifik yang dilanggar: PROD004 = -6.70% vs threshold -2.0% — melewati batas 235%.

- Produk yang terdampak: Reksa Dana Saham Bluechip, dengan nilai holding Rp 2.000.000.000.

- Konteks profil risiko: Kondisi ini bertentangan dengan profil risiko nasabah yang agresif, karena return negatif yang signifikan ini menunjukkan bahwa portofolio tidak sesuai dengan toleransi risiko yang diharapkan. [Profil Nasabah]

- Severity justification: Diklasifikasikan sebagai HIGH karena kerugian yang dialami cukup besar dan melebihi ambang batas yang ditetapkan, yang dapat berdampak signifikan pada total AUM nasabah.

📋 PENILAIAN DAMPAK

- Dampak finansial saat ini: Rp 148.000.000 (kerugian) [Profil Nasabah]

- Dampak terhadap total AUM: 26,43% dari total portofolio

- Skala urgensi: TINGGI — Kerugian yang dialami cukup signifikan dan melebihi ambang batas yang ditetapkan.

- Risiko jika tidak ditindaklanjuti dalam 48 jam: Nasabah berisiko mengalami kerugian lebih jika pasar terus bergerak negatif, dan juga kehilangan kesempatan untuk meminimalkan kerugian dengan tindakan cepat.

✅ TINDAKAN SEGERA (0-48 Jam)

1. Jam 09:00, Telepon: Hubungi nasabah untuk membahas alert ini dan dampaknya.

2. Jam 10:00, Siapkan Materi: Lakukan analisis mendalam terhadap performa produk dan alternatif yang tersedia.

3. Jam 13:00, Meeting: Diskusikan opsi rebalancing atau switch produk dengan nasabah.

RefreshX Tutup

AI SUMMARY — RINGKASAN PERCAKAPAN CALL CENTERRe-generate

Ringkasan Interaksi

Nasabah CUST003, Bapak Hendra Kusuma Jati, memiliki interaksi yang cukup intens dengan call center Bank Danamon dalam kurun waktu satu bulan terakhir. Frekuensi interaksi mencapai 3 kali, dengan topik yang beragam, mulai dari keluhan penurunan nilai reksa dana, inquiry deposito jatuh tempo, hingga penawaran produk asuransi jiwa unit link. Tren sentimen menunjukkan adanya kecenderungan negatif hingga positif, dengan keluhan penurunan nilai investasi sebagai topik dominan.

Isu & Keluhan Utama

1. Penurunan Nilai Reksa Dana:

Nasabah khawatir dengan penurunan nilai reksa dana saham bluechip hampir 8% dalam sebulan. Status resolusi: Call center mengedukasi nasabah tentang fluktuasi pasar dan menjanjikan follow-up dari RM.

2. Informasi Deposito dan Obligasi:

Nasabah menanyakan rate deposito terbaru dan informasi produk obligasi. Status resolusi: Call center memberikan informasi dan mengarahkan nasabah untuk konsultasi dengan RM sebelum mengambil keputusan.

Insight untuk RM

- Nasabah menunjukkan kecamasan terhadap fluktuasi pasar yang berdampak pada nilai investasi. RM perlu memberikan edukasi dan rekomendasi strategi investasi yang sesuai dengan profil risiko nasabah.

- Terdapat minat produk asuransi jiwa unit link, dengan pertimbangan potensi return yang menarik dan perlindungan jiwa. RM disarankan untuk mempersiapkan proposal lengkap dan menjelaskan fleksibilitas produk.

- Nasabah juga tertarik dengan produk obligasi pemerintah. RM dapat memberikan rekomendasi produk ORI024 dan menjelaskan detail teknisnya.

Tindak Lanjut yang Disarankan

Tindakan Lanjut yang Disarankan

1. Melakukan follow-up secepatnya terkait keluhan penurunan nilai reksa dana, memberikan analisis pasar, dan menawarkan strategi diversifikasi portofolio.

2. Menyiapkan proposal produk asuransi jiwa unit link dan menjelaskan manfaat serta fleksibilitasnya, termasuk potensi return dan perlindungan jiwa.

3. Membahas produk obligasi ORI024 dan produk deposito dengan rate khusus nasabah Prioritas, membantu nasabah dalam mengambil keputusan investasi yang sesuai dengan tujuan keuangan dan profil risikonya.

Keluhan penurunan nilai reksa dana

20 May 2026

Rina Susanti

8m 0s

PERCAKAPAN

[00:00] Agent Rina: Selamat siang, Bank Danamon, dengan Rina, ada yang bisa saya bantu?

[00:05] Nasabah (Hendra): Iya siang. Saya mau tanya soal reksa dana saya. Kenapa nilainya turun drastis ya? Hampir minus 8% dalam sebulan.

[00:15] Agent Rina: Baik Pak Hendra, saya cek dulu ya. Mohon tunggu sebentar... Benar Pak, untuk Reksa Dana Saham Bluechip Anda memang mengalami penurunan seiring kondisi pasar global yang sedang volatile.

[00:45] Nasabah: Iya tapi saya kan sudah investasi hampir 3 tahun. Ini bikin saya khawatir. Apa sebaiknya saya tarik saja?

[01:05] Agent Rina: Saya mengerti kekhawatiran Bapak. Namun untuk keputusan investasi yang lebih komprehensif, saya sarankan Bapak berkonsultasi langsung dengan RM Anda, yaitu Bu Anisa Rahma. Beliau bisa memberikan analisis lengkap sesuai profil risiko Bapak.

[01:30] Nasabah: Kapan bisa dihubungi? Saya butuh kepastian segera.

[01:38] Agent Rina: Saya akan catat permintaan callback dari Bapak. Bu Anisa akan menghubungi Bapak dalam 1x24 jam kerja.

[01:50] Nasabah: Baik, tolong dipercepat ya. Saya juga ingin tahu apakah ada produk yang lebih aman untuk kondisi pasar sekarang.

[02:10] Agent Rina: Tentu Pak, akan saya sampaikan ke RM Bapak. Apakah ada hal lain yang bisa saya bantu?

[02:20] Nasabah: Tidak, itu saja. Terima kasih.

[02:25] Agent Rina: Baik Pak Hendra. Terima kasih sudah menghubungi Bank Danamon.

Resolusi: Nasabah diedukasi mengenai fluktuasi pasar. Dijanjikan follow-up dari RM.

EVALUATION - PARTIAL

OVERVIEW

- ✓ Maturity detection within 30/60/90-day horizon
AI Agent for detecting upcoming product maturities in the RM's portfolio. The RM initiates an analysis run that queries Oracle ADB for expiring products and generates personalized reinvestment recommendations via OCI Generative AI.
- ✓ AI reinvestment action plan generated per customer

- ⚠ Talking points are generic; no per-customer dialogue script

- ✗ ON-DEMAND only — no automated push/email scheduler

KEY FEATURES

- ✗ No product documents/brochures attached to reminder
Scans all active holdings with maturity dates within configurable horizon (30/60/90 days)

- AI analysis powered by Oracle Private Agent Factory (PAF) tools

- Customer segmentation with AUM and product type context

- One-click "Run Analysis" triggers Oracle AI Agent pipeline

- History button to review previous analysis runs from Oracle DB

RM Action Plan

DASAR SELEKSI NASABAH

Dewi Lestari, nasabah Privilege dengan profil risiko Moderate, menjadi prioritas karena deposito reguler sebesar Rp 250.000.000 akan jatuh tempo dalam 1 hari. Urgensi analisis ini dinilai TINGGI, mengingat potensi dana idle yang cukup signifikan jika tidak segera ditindaklanjuti, yaitu sebesar Rp 250.000.000.

ANALISIS PORTOFOLIO SAAT INI

Portofolio Dewi Lestari

OVERVIEW

- ✓ Action Plan Follow-up CTA button available
- ✓ AI-generated maturity analysis output. The agent identifies customers with products approaching maturity and produces tailored reinvestment action plans with product recommendations based on risk profile and current market rates. Share via Email / WhatsApp for customer outreach

- Action plan lacks structured talking-point format

-  No supporting data/document attachment per reminder

KEY FEATURES

- Per-customer maturity summary with product name, amount, and days remaining

- AI-recommended reinvestment products matched to customer risk profile

- Estimated yield improvement from rolling over to suggested alternatives

- Action buttons: Share via Email / WhatsApp, Action Plan Follow-up, Customer 360

- Copy-to-clipboard for quick use in CRM or email drafting

EVALUATION - PARTIAL

OVERVIEW

- ✓ Risk profile, portfolio gap, AUM potential used for matching AI-powered Next-Best-Product recommendation engine. Analyzes each customer's portfolio gaps, transaction history, risk profile, and market conditions to surface the most relevant product offers for the RM to present.
- ✓ Multi-factor scoring: risk alignment + urgency

⚠ Recommendations are batch-wide, not per-customer on demand

✗ No product risk/benefit/tenor detail displayed per item

KEY FEATURES

■ Runs via Oracle PAF Agent with access to PRODUCT_CATALOG and customer holdings

■ Multi-factor scoring: portfolio gap, risk alignment, AUM potential, urgency

■ Top-N recommendations per customer with rationale explanation in Bahasa Indonesia

■ Products ranked by cross-sell probability and estimated revenue contribution

■ Configurable customer scope: priority segment or full portfolio

Oracle AI · Bank Danamon Intelligence RM Platform · POC 2026

Module 06

EVALUATION - PARTIAL	
OVERVIEW	
✓	Ranked list with fit score + AI rationale in Bahasa Recommendation analysis results showing per-customer product suggestions with actionable next steps, share options, and direct link to Customer 360.
⚠	Product details (risks, tenor, return) not explicitly shown
✗	No individual customer lookup — must run full portfolio scan
KEY FEATURES	
■	Ranked product list per customer with fit score and key rationale
■	Market context used in recommendation (BI Rate, IHSG, currency rates)
■	Estimated AUM uplift and product category diversification impact
■	Direct CTA to open Customer 360 for immediate consultation preparation
■	Share via Email / WhatsApp for remote customer outreach

Overview

Copilot query input showing the conversational interface with suggested prompts and response area. The Copilot uses Oracle Select AI and PAF tools to synthesize answers from live Oracle ADB data.

KEY FEATURES

- Suggested query chips for common RM workflows (portfolio summary, top risks, etc.)
- Free-text input with Enter-to-send and send button
- Streaming response display with markdown formatting support
- Source citation: responses indicate which Oracle DB tables were queried
- Clear conversation / history navigation for session management

Overview

KEY FEATURES

- AUM Velocity widget: 6-month trend chart with 2-month AI forecast
- Customer Health Distribution: pie chart of health scores across portfolio
- Customer Intelligence Radar: churn risk vs. opportunity scoring bubble chart
- RM Productivity Cockpit: per-RM AUM, customer count, and activity metrics
- AI-generated executive insights per widget via OCI Cohere

Overview

Scrolled executive view showing RM productivity comparison, Next Best Actions aggregated across all RMs, and the AI insight panels for each analytics widget.

KEY FEATURES

- RM Cockpit: AUM leaderboard with days-since-last-contact and alert count per RM
- NBA Aggregation: top next-best-actions across the entire bank portfolio
- AI Insight panels: per-widget OCI Cohere analysis with actionable narrative
- Alert category breakdown by type and severity count
- Real-time data refresh from Oracle EXEC_AUM_MONTHLY and live customer tables

Dewi Lestari: Dana Idle 67.6% — Peluang Investasi - **idle_cash_pct: 67.6 (threshold: 40.00)** 30 May 12:32

Overview

Regulatory compliance monitoring module. Tracks KYC status, suitability assessment completeness, documentation expiry, and audit trail across all customer interactions recorded in Oracle ADB.

KEY FEATURES

- KYC status overview: Verified / Pending / Expired breakdown across portfolio
- Suitability assessment compliance rate with drill-down by customer segment
- Document expiry alerts with 30/60/90-day advance warning
- Complete audit trail of all RM actions stored in AUDIT_LOG table
- Regulatory reporting summary exportable for compliance officer review

Private Agent Factory - Oracle DB 26ai

Campaign Eligibility

Applies campaign rule engine against full RM portfolio to identify qualifying customers.

Running - Campaign - Last run: 29 May 18:41

PAF Alert Trigger

Fires portfolio alerts when thresholds are breached. Configurable rules per product type.

Running - Alert - Last run: 29 May 18:41

PAF KYC Agent

Validates customer identity, checks KYC expiry, flags compliance risks in real-time.

Running - Compliance - Last run: 29 May 18:41

PAF Market Monitor

Ingests live market feeds (JCI, USD/IDR, sector data) and evaluates portfolio exposure.

Running - Monitor - Last run: 29 May 18:41

PAF Profile Agent

Builds customer financial persona from transaction history, goals, and risk questionnaire.

Running - Profiling - Last run: 29 May 18:41

PAF Promotion Agent

Matches customers to active campaigns and promotions based on profile and eligibility.

Running - Campaign - Last run: 29 May 18:41

PAF Scheduling Agent

Monitors deposit maturity dates, triggers maturity reminder workflows, schedules RM outreach.

Running - Scheduler - Last run: 29 May 18:41

HNSW

Overview

System administration panel for managing users, RM assignments, system configuration, and monitoring Oracle ADB health. Accessible to manager role accounts only.

KEY FEATURES

- User management: create/deactivate RM accounts and assign customer portfolios
- Oracle ADB connection health monitor with pool utilization metrics
- AI model configuration: manage OCI model endpoints and PAF agent settings
- System-wide settings: session timeout, cache TTL, alert thresholds
- Audit log viewer with filter by user, action type, and date range

Overview

Admin console detail view showing RM-to-customer assignment management and Oracle ADB system monitoring panels.

KEY FEATURES

- RM–Customer assignment table with bulk reassignment capability
- Oracle ADB pool status with active connections and query performance
- PAF Agent activity log: recent agent invocations and response times
- Vector embedding status: customer profiles with up-to-date embeddings
- Database migration runner for schema updates (accessible to admin only)

Module 12

Technical Architecture

Bank Danamon Intelligence RM Platform · Technical Stack

Frontend (Browser)	- Single-Page Application (HTML/CSS/JavaScript) - apiFetch() universal REST client with JWT auth headers	- Responsive dark-theme UI with Oracle-aligned design language - Chart.js for AUM trend, health distribution, CI radar visualizations
Backend API (Node.js / Express)	- RESTful API: /api/auth, /api/customers, /api/executive, /api/copilot - Oracle AI Agent factory routes (PAF): maturity, reco, campaign, alerts	- JWT middleware for authentication + role-based authorization - asyncHandler pattern with centralized error handling
Oracle Database 26ai	- Oracle Autonomous Database 26ai with Vector Search (VECTOR columns) - AI Insights cache: CUSTOMER_AI_INSIGHTS, EXEC_AUM_MONTHLY	- Tables: CUSTOMERS, PRODUCTS, HOLDINGS, ALERTS, RM_APPOINTMENTS, AUDIT_LOG - Oracle SELECT AI: natural language SQL via AI Copilot
OCI Generative AI (Cohere Command R+)	- LLM: cohere.command-r-plus via OCI Generative AI Service - RAG pipeline: vector embeddings → semantic search → context-augmented generation	- Oracle Private Agent Factory (PAF): tool-calling agents for RM workflows - Rule-based fallback when LLM unavailable (zero downtime)
